

PRODUCT INFORMATION

DRILLOGEL

AM2F DRILLOGEL is a synthetic polymer thickening agent based on a proprietary copolymer compound. **AM2F DRILLOGEL** is extremely efficient in increasing the viscosity of water-based drilling mud and/or completion fluid for frac plug drill out to clean and sweep thoroughly. DRILLOGEL has the following advantages :

- Easy handling without dusting and/or fisheye
- High yield point for highly effective cuttings removal
- Fast dissolution and hydration
- Highly stable and resistant to thermal degradation
- Can be broken down for low residue cleanup
- Inherent drag/friction reduction capability

Grade	General Grade DG-H3	High Brine Grade DG-SW
Appearance	Beige Liquid	White Powder
Active Ingredient	~ 35%	100 %
Density	8.0~8.4 lb/gal	0.85~0.92 g/cm ³
