

PRODUCT INFORMATION

Organic Bentonite

AM2F Energy Organic Bentonite is a highly efficient rheological additive to produce thixotropic gel in a low to medium polarity system.

AM2F Energy Organic Bentonite is a chemically treated lamellar structured bentonite clay product which can be dispersed easily in mineral oil or other low polar solvent.

AM2F Energy Organic Bentonite shows excellent stability over a long period of time, making it an ideal suspension agent for blending either guar or EXCELOGEL slurry.

TYPICAL CHARACTERISTICS

Appearance	Off White Powder
Loss on Ignition	33 - 36 %
Fineness,76 um (200 mesh)	≥ 95%
Moisture content	0.8 - 3.5 %
Viscosity	≥ 900 mPa·s
